KNAUF INSULATION
it's time to save energy

Knauf EcoBatt™ Insulation with ECOSE™ Technology...

ALL Knauf products are sustainable. EcoBatt Glasswool Insulation with ECOSE Technology takes that standard to a whole new level.

ECOSE Technology is made from rapidly renewable organic materials instead of oil-based chemicals for greater sustainability - up to 70% less energy intensive than traditional binders. EcoSE Technology is a revolutionary new natural binder that contains no phenol, formaldehyde, acrylics or artificial colors.

Lab Tested, Mother Nature Approved!

American Insulation and Knauf Insulation proudly presents, first of its kind for our Eco friendly customers and builders. Knauf EcoBatt™ Insulation with ECOSE™ Technology.

ECOSE™ Technology is made from rapidly renewable organic materials instead of oil based chemicals for greater sustainability-up to 70% less energy intensive than traditional binders. ECOSE™ Technology is a revolutionary new natural binder that contains no phenol, formaldehyde, acrylics or artificial colors.

EcoBatt™ Glasswool Insulation made with ECOSE™ Technology contains a high concentration of one of the worlds most abundant renewable resources- sand, and at least 30% recycled bottle glass bonded with ECOSE™ Technology. The products are available unfaced or with Kraft, foil or flame rated KSK-25 (foil-scrim Kraft) foil facings.

ECOSE™ Technology

Up to 70% less embodied energy than traditional binders.

Contains no phenol, formaldehyde, acrylics, or artificial colors.

No oil based chemicals. Converts natural, rapidly renewable, organic materials into atotally inert polymer for superior environmental sustainability.

Features and Benefits Proven Performance

Preferred by professional installers concerned with quality, appearance and productivity. Excellent acoustical properties reduce sound transmission in the home when properly installed in partition walls, ceiling and floor systems.
